

June 2009

Dear Valued Comcast Customer:

We will shortly be adding more International channels in an effort to provide greater programming choices to our valued customers.

We are moving all existing International networks to new channel numbers to make room for these new channels as they become available in the United States.

Beginning **August xx – August xx, 2009**, the International channel(s) you are currently enjoying will **move to another channel**. This will all take place with no interruption of your programming. You will only need to tune to the new channel number (found on the enclosed channel line-up card) on the above date.

If you have any questions, feel free to contact a Comcast customer service agent at **1-800-519-6568**.

A translator service is available for your convenience if needed.

Available starting this August in your neighborhood:

For programming information visit www.comcast.com/internationaltv

Sincerely,

Comcast
